

Claims Management Systems (CMS)

Claims Management System is a comprehensive end-to-end solution to manage Insurance claims by brokers, underwriters, loss adjusters, captives and self-insured. Using CMS will reduce paper work and time involved in coordinating various parties involved, and improve efficiency dramatically.

Zylog's state of the art, web-based or Windows-based systems are your flexible, cost effective solution for all your reporting needs and for reducing your transactional costs.

A very flexible system that can be hosted by us or by you and can be easily integrated with your existing mainframe systems and linked to centralised systems. It will enhance your reporting base and ease the burden of your industry regulators' requirements.

A simple, inexpensive and totally customised solution that suits your need and challenges the competition in this sector.

Salient Features

- Workflow, automatically driving the transition of tasks from one party to the next throughout the lifetime of a file, reducing and monitoring the time required between each process, avoiding delays and ensuring nothing is lost.
- Repository (all documentation and information in one place).
- Simple dissemination of information to multiple parties.
- Internal and/or external messaging via email and/or SMS and/or fax (with messages automatically copied to files or viewable only by sender and recipient).
- Approved suppliers database and search facility based on post/zip codes.
- Centralised address book.
- A file administration system.
- A monitoring/management system for out-sourced work.
- Real time access and reporting.
- Bespoke key performance indicators.
- Audit trail by means of automatic date and time stamping of all transactions.
- Management information system that can report according to user-selected parameters.
- Archive with full search facility (files can be transferred easily to an archive database or returned to the active file database).
- Security on par with the banking industry, including 128-bit encryption and password protection.
- FSA/compliance & management control.
