

Microsoft Dynamics RMS Customer Transaction Report

Microsoft Dynamics RMS Customer Transaction Report

Custom Development Solutions
Mobility Solutions
Microsoft Business Solutions

ZSL's Microsoft Dynamics RMS Customer Transaction Report is an add-on component developed to address the supplemental business needs of the small and mid-size retailers by providing them integrated solution to manage operations within one store or across a chain of stores. This add-on solution helps you to have reliable reporting on purchases made by customers with their signatures printed on the generated transaction reports.

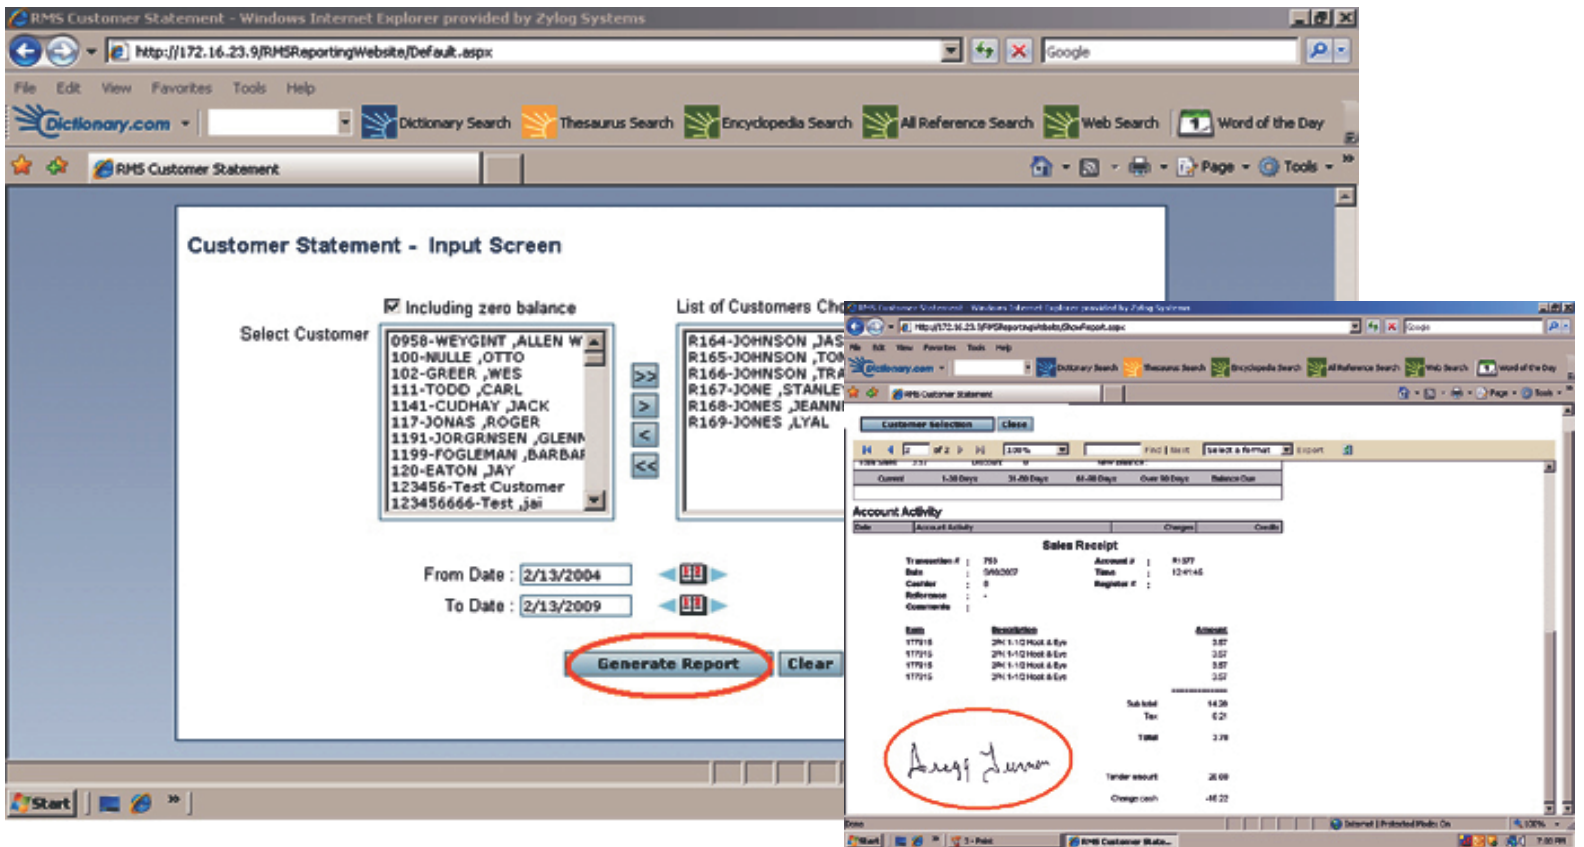

ZSL designed Microsoft Dynamics RMS Customer Transaction Report add-on component to help you automate and accelerate your administrative operations while dealing with credit card and other types of payments. It adds more reliable proof on the transactions done by the customers in the store.

Significant Features of ZSL's Microsoft Dynamics RMS Customer Transaction Report

ZSL's Microsoft Dynamics RMS Transaction Report provides complete dynamic end-to-end business solution for retail companies in managing customer transaction operations electronically, thus reducing the considerable amount of man hours and cost spent on producing and maintaining registers. The significant features of Microsoft Dynamics RMS Transaction Report add-on solutions are:

- ▶ Scans the customer signature against the respective transactions and stores it in the Microsoft RMS database
- ▶ Customer signatures are stored in the encrypted format
- ▶ The encrypted format is decoded and printed as image in the customer transaction report
- ▶ Customer signature capture and printing on transaction report is governed by a set of well-built business rules
- ▶ Capability of storing huge volume of data
- ▶ Repeated customer's signature are fetched from the database and printed on the transaction reports
- ▶ Easy integration with RMS POS receipt

Benefits of Microsoft Dynamics RMS Customer Transaction Report

- ▶ Automated process of printing customer signature on the transaction report
- ▶ Reduces the labor cost and time involved in creating and maintaining registers
- ▶ Enables you to generate reports on transaction for any required period of time
- ▶ One time capture of customer signature and re-using it for subsequent purchases
- ▶ Easy trace on customer's signature for verification
- ▶ Helps you to validate and claim the credit card and other type of payments in case of any failure or misrepresenting payments
- ▶ Faster implementation and easy integration with Microsoft Dynamics RMS
